Latest News

- Create custom profiles

With [VSO Video Converter](#), [Blu-ray Converter](#) and [DVD Converter](#), you can create tailor-made projects with the exact settings of your choice. [See how](#) you can set your custom profile and save it for future use.

- New: Karaoke file support

If you are a karaoke fan, you'll be pleased to hear that [VSO Video Converter](#) now supports the karaoke file format cdg, so you can create karaoke playlists and convert them to any format!

Great Ideas

- Become a VSO Ambassador

Are you part of a computer club, a company, a school or university? Do you think your organization could benefit from using our products? Then why not become a VSO ambassador! [Contact us](#) and we'll work out discounts and rewards.

Did you know?

- Understanding Blu-ray structure

The Blu-ray structure is made of multiple sub-folders and can be quite puzzling when you open it. [In this guide](#), we explain how the structure is built and tell you which folder to choose when loading a BD file into our programs.

If you want to contact us please use [support form](#) or our [Facebook](#) and [Twitter](#) accounts. Bye for now!
